

# SoftIndicator

By Progressive

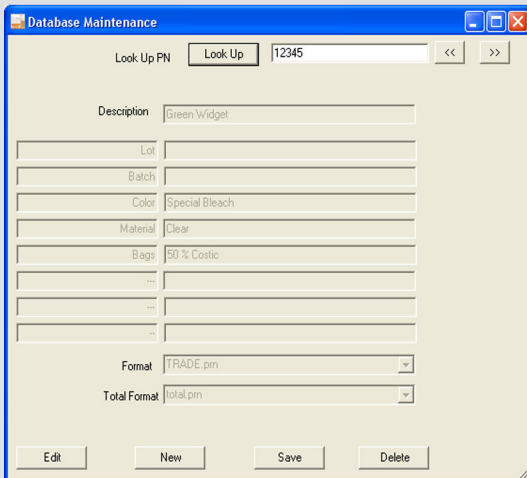

Main Screen

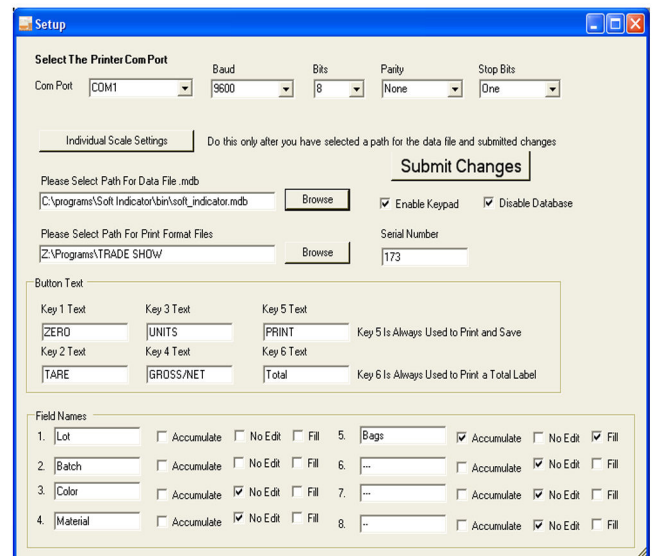

This highly configurable Scale Data Collection System is designed to work with any streaming Bi-directional RS-232 indicator or balance. Each button can be configured with its own unique name and RS-232 output for external indicator control. Simple customizable prompts. Easy format set up allows each database entry to print to up to 2 different labels (transaction and total) with different customizable formats. Bar code data entry and printing. Log every transaction into an MS Access database. Call Now for a live demo of the new Soft Indicator 3.75. Demo's also available online.
